

SRINIVAS KANAGARE J

☎ 8792707526 ✉ kangaresrinivas@gmail.com 🌐 GitHub 📄 LinkedIn 📍 Pune, India

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience developing software applications, backend services, and AI/ML solutions using Python, Java, Flask, REST APIs, and TensorFlow. Experienced in building end-to-end applications, integrating APIs and databases, and using Docker and GitHub Actions for application packaging and deployment. Strong foundation in data structures, algorithms, object-oriented programming, and software engineering.

EDUCATIONS

Atria Institute of Technology | Bangalore
Bachelor of Engineering (B.E.) – Computer Science and Design

2022 - 2026
CGPA : 7.53/10

WORK EXPERIENCE

Android App Development using Gen AI Intern | Internship

Feb 2026 - May 2026
Remote • Bangalore, Karnataka

MindMatrix.io (CL Infotech Pvt. Ltd.)

- Developed and supported application features through structured **Android development** tasks and practical projects.
- Assisted with feature implementation, testing, debugging, and documentation.
- Applied software development concepts in a product-oriented environment with **cross-functional collaboration**.

Technologies / Skills Used : Android Studio, Java, Kotlin, Jetpack, Gen AI, Gradle

PROJECTS

RAG Based AI Teaching Assistant | 🌐 Github

Developer

- Developed a **RAG-based AI teaching assistant** using Python and Groq LLMs to generate context-aware responses from educational content.
- Built **semantic embedding and retrieval pipelines** with Ollama, enabling efficient matching of user queries with relevant content.
- Processed **video/audio content using OpenAI Whisper** and semantic chunking to create a searchable educational knowledge base.
- Developed **Flask REST APIs with streaming LLM responses**, integrating retrieval, context generation, and real-time answer delivery.

Technologies / Tools Used : Python, React, Flask, Groq API, Embedding, RAG, OpenAI Whisper, Scikit-learn, Joblib, GenAI, LLMs, Numpy, Pandas, Ollama, REST APIs

Brain Tumor Detection System | 🌐 Kaggle.com

Developer

- Developed a multi-class brain tumor classification model using **Transfer Learning** with **InceptionV3** to classify MRI scans into **Glioma, Meningioma, Pituitary Tumor, and No Tumor**.
- Fine-tuned the pre-trained **InceptionV3** model with **Early Stopping** and **Model Checkpointing**, achieving **88.75% accuracy**.
- Performed image preprocessing, augmentation, normalization, and dataset preparation to improve model generalization.
- Presented the research work at **ICETSE 2025**.

Technologies / Tools Used : Python, TensorFlow, InceptionV3, Machine Learning

SKILLS

AI / Machine Learning :	Machine Learning, Deep Learning, RAG, Embeddings, TensorFlow, Keras, Scikit-learn, Pandas, Numpy
LLM / GenAI :	LLM Applications, RAG, BGE-M3, Whisper, Ollama, Gemini, Hugging Face, Microsoft Copilot, OpenAI, Prompt Engineering
Programming Languages :	Python, JavaScript, SQL, Java, C++, C
Backend / Web :	Flask, React.js, REST APIs, HTML5, CSS3, Tailwind CSS, FastAPI
Tools & Platforms :	Git, GitHub, GitHub Actions, Docker, Docker Hub, Postman, GitHub Actions + Docker, Bitbucket, Linux
Databases :	MySQL, MongoDB
